

HYPERINFLATIONARY ECONOMIES UPDATE

International Financial Reporting Bulletin 2024/11
December 2024

BACKGROUND

IAS 29, *Financial reporting in hyperinflationary economies* applies when an entity's functional currency is 'hyperinflationary'.

IAS 29 requires the financial statements (including any comparative periods) to be stated in terms of the measuring unit current at the end of the applicable reporting period. This is because the currency of a hyperinflationary economy loses a significant amount of purchasing power from period to period such that presenting financial information based on historical amounts, even if only a few months old, does not provide relevant information to users of financial statement.

The term 'hyperinflation' is not defined in IAS 29, as it is a matter of judgment. IAS 29 provides the following characteristics of a hyperinflationary economy (IAS 29.3):

- (a) *the general population prefers to keep its wealth in non-monetary assets or in a relatively stable foreign currency. Amounts of local currency held are immediately invested to maintain purchasing power;*
- (b) *the general population regards monetary amounts not in terms of the local currency but in terms of a relatively stable foreign currency. Prices may be quoted in that currency;*
- (c) *sales and purchases on credit take place at prices that compensate for the expected loss of purchasing power during the credit period, even if the period is short;*
- (d) *interest rates, wages and prices are linked to a price index; and*
- (e) *the cumulative inflation rate over three years is approaching, or exceeds, 100%.*

International Monetary Fund (IMF) publishes historical and projected inflation data by country.

During 2024, the list of hyperinflationary economies (and those economies on our watchlist) has continued to evolve due to deteriorating economic conditions and high inflation in several countries. The jurisdictions on the list of hyperinflationary economies must apply IAS 29, which results in financial statements (both current and prior comparative periods) being restated to reflect current inflation rates.

Based on the IMF's [October 2024 World Economic Outlook](#) (IMF WEO), below is an updated snapshot of countries which were hyperinflationary in 2023, countries which have become hyperinflationary (or have ceased to be hyperinflationary) during 2024, and countries which are at risk of becoming hyperinflationary in 2025.

ACCOUNTING IMPACT

With increasing inflation rates and declining economic conditions around the world, more countries have become hyperinflationary in 2024, including Lao People's Democratic Republic and Malawi.

<i>ECONOMIES WHICH WERE HYPERINFLATIONARY AS AT 31 DECEMBER 2023</i>	<i>ECONOMIES WHICH HAVE BECOME HYPERINFLATIONARY IN 2024</i>	<i>ECONOMIES WHICH HAVE CEASED TO BE HYPERINFLATIONARY IN 2024</i>	<i>ECONOMIES THAT HAVE A RISK OF BECOMING HYPERINFLATIONARY WATCHLIST FOR 2025 AND ONWARDS</i>
<ul style="list-style-type: none"> ▶ Argentina ▶ Ethiopia ▶ Ghana ▶ Haiti ▶ Islamic Republic of Iran ▶ Lebanon ▶ Sierra Leone ▶ South Sudan ▶ Sudan ▶ Suriname ▶ Turkey ▶ Venezuela ▶ Yemen¹ ▶ Zimbabwe² 	<ul style="list-style-type: none"> ▶ Lao People's Democratic Republic³ ▶ Malawi⁴ 	<ul style="list-style-type: none"> ▶ Yemen¹ ▶ Zimbabwe² 	<ul style="list-style-type: none"> ▶ Angola⁵ ▶ Burundi⁶ ▶ Egypt⁷ ▶ Myanmar⁸ ▶ Nigeria⁹ ▶ Pakistan¹⁰ ▶ Sri Lanka¹¹ ▶ Syria¹² ▶ Zimbabwe²

¹ **Yemen's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 28% by the end of 2024, down significantly from previous years. Given current inflation rates and expected further decreases, Yemen is no longer considered hyperinflationary from 30 June 2024 onwards.

² **Zimbabwe's** Zimbabwean Dollar (ZWL) currency was considered hyperinflationary for a number of years, however, in mid-2024, the Zimbabwe Gold (ZiG or ZWG) was introduced. ZiG is not considered to be simply a redenomination of the ZWL, therefore, its classification as hyperinflationary or not is considered independently. The rate of inflation appears to indicate that the ZiG is not hyperinflationary, however, numerous qualitative factors noted in IAS 29.3 remain applicable in Zimbabwe. Zimbabwe will remain on the watchlist in 2025.

³ **Lao People's Democratic Republic's** (Lao P.D.R.) 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 101% by the end of 2024, with inflation forecasted to increase further from 2025-2027. Given current inflation rates and expected further increases, Lao P.D.R. is considered hyperinflationary as at 31 December 2024.

⁴ **Malawi's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 106% by the end of 2024. The National Statistics Office of Malawi released local statistics which also show 3-year cumulative inflation rate of 116%. Malawi is considered hyperinflationary as at 31 December 2024.

⁵ **Angola's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 75% by the end of 2024 and 83% for 2025. Given current inflation rates and future forecasts, Angola is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high.

⁶ **Burundi's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 83% by the end of 2024 and 86% for 2025. Given current inflation rates and future forecasts, Burundi is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high.

⁷ **Egypt's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 96% by the 30 June 2024 and 101% for 30 June 2025. Numerous qualitative factors noted in IAS 29.3 remain applicable in Egypt, and local data published by the Central Agency for Public Mobilization and Statistics reported 3-year cumulative inflation as at 30 September 2024 of 101%. Considering all of the factors in IAS 29, and expected financial interventions, Egypt is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high and Egypt may become hyperinflationary in 2025.

⁸ **Myanmar** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 97% by the end of 2024 and 68% for 2025. Given current inflation rates and future forecasts, Myanmar is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high.

⁹ **Nigeria's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 102% by the end of 2024 and 101% for 2025. Numerous qualitative factors noted in IAS 29.3 remain applicable in Nigeria, and local data published by the Central Bank of Nigeria reported 3-year cumulative inflation as at 31 August 2024 slightly over 100%. Considering all the factors in IAS 29, and expected financial interventions, Nigeria is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high and Nigeria may become hyperinflationary in 2025.

¹⁰ **Pakistan's** 3-year cumulative inflation rate in the IMF WEO's forecasts was projected to be 61% by the end of 30 June 2024 and 33% for 30 June 2025. Given current inflation rates and future forecasts, Pakistan is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high.

¹¹ The October 2024 IMF WEO does not report data and projections for 2023 due to ongoing discussions on restructuring of sovereign debt, making the 3-year cumulative inflation rate difficult to estimate. Local data published by the Central Bank of **Sri Lanka** reports 12-month cumulative inflation of 0% as at 30 September 2024. Given current inflation rates and future forecasts, Sri Lanka is not currently considered to be hyperinflationary, but its hyperinflationary status should continue to be monitored as inflation remains high.

¹² **Syria's** 3-year cumulative inflation rate may already be over 100%, however, data is incomplete. Syria was previously considered hyperinflationary, and given ongoing political instability in the country, entities with operations in Syria should consider monitoring the hyperinflationary status of the country.

This publication has been carefully prepared, but it has been written in general terms and should be seen as broad guidance only. The publication cannot be relied upon to cover specific situations and you should not act, or refrain from acting, upon the information contained therein without obtaining specific professional advice. Neither BDO IFR Advisory Limited, and/or any other entity of BDO network, nor their respective partners, employees and/or agents accept or assume any liability or duty of care for any loss arising from any action taken or not taken by anyone in reliance on the information in this publication or for any decision based on it.

The BDO network (referred to as the 'BDO network' or the 'Network') is an international network of independent public accounting, tax and advisory firms which are members of BDO International Limited and perform professional services under the name and style of BDO (hereafter 'BDO member firms'). BDO International Limited is a UK company limited by guarantee. It is the governing entity of the BDO network.

Service provision within the BDO network in connection with International Financial Reporting Standards (IFRS) Accounting Standards (comprising IFRS Accounting Standards, International Accounting Standards, and Interpretations developed by the IFRS Interpretations Committee and the former Standing Interpretations Committee), and other documents, as issued by the International Accounting Standards Board, IFRS Sustainability Disclosure Standards as issued by the International Sustainability Standards Board, and European Sustainability Reporting Standards (ESRS) published in the Official Journal of the European Union, is provided by BDO IFR Advisory Limited, a UK registered company limited by guarantee. Service provision within the BDO network is coordinated by Brussels Worldwide Services BV, a limited liability company incorporated in Belgium.

Each of BDO International Limited, Brussels Worldwide Services BV, BDO IFR Advisory Limited and the BDO member firms is a separate legal entity and has no liability for another entity's acts or omissions. Nothing in the arrangements or rules of the BDO network shall constitute or imply an agency relationship or a partnership between BDO International Limited, Brussels Worldwide Services BV, BDO IFR Advisory Limited and/or the BDO member firms. Neither BDO International Limited nor any other central entities of the BDO network provide services to clients.

BDO is the brand name for the BDO network and for each of the BDO member firms.
